since March 1, 2010
The Mission of our hospital

- A center of pediatric care in Tokyo
- Medical treatment that centers in children
- Medical treatment that unifies mind and body
- Medical treatment considering on growth and development of children
- Medical treatment cooperating with society
The Mission of our Nursing Department

- We esteem the personality of each child who carries the future, and provide specialized nursing care in high quality that brings up children’s growth and development.
- We offer children a safe, comfortable nursing in cooperation with the medical team and the family.
- Each nurse demonstrates flexible ideas and creativity for improving the nursing.
Nursing at our hospital

- We offer total nursing which unifies mind and body in cooperation with medically staff.
- We have a skill for nursing patients, not only in general, speciality, and psychiatry wards but also in an emergency room and a pediatric intensive care unit.
- We care for patients during childhood, from a premature baby to a junior High school students. We can also contribute in transferring patients from our hospital to adult one.
- We educate continuously nurse who can work in our hospital which is a center for pediatric care in Tokyo, especially Tama area.
